Document Creation date: 11/04/2024	
Last Update: 21/05/2024	
App Version: 15.10.0	
App Version: 15.20.1 includes the feature "delivery/pickup" in cart	
Purpose: Test the quality and functionality of Tiv Ta'am app	
Tester: Lidar Moshe	
Pur Pur ut	
Bug Report	
Test Environment information:	
Mobile: Samsung Galaxy A50	
Android Version: 11	
Test strategy specification:	
The test will run manualy by exploratory technique	
Entry Terms:	
Must download Tiv Ta'am app	
Exit Terms:	
1. 0 Blockers	
2. 1 Critical	
3. 5 Major	
4. 7 Minor	
5. 10 Low	
Test levels that will be performed:	
1. Smoke	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature	
Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly	
Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed:	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI	
Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed:	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative 4. Usability	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative 4. Usability 5. Interface 6. Accessibility	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative 4. Usability 5. Interface 6. Accessibility 7. Boundary	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative 4. Usability 5. Interface 6. Accessibility 7. Boundary 8. Install/UnInstall	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Functional Negative 4. Usability 5. Interface 6. Accessibility 7. Boundary 8. Install/Uninstall 9. Error Handling	
2. Sanity - in version 15.20.1 the option for delivery and pickup added to "cart" feature 3. Regression - after launching version 15.20.1, a regression test was made to make sure everything works properly Type of tests that will be performed: 1. GUI 2. Functional Positive 3. Bug Severity:									
1. Low - bugs will have no noticeable impact on a product and will not result in a system breakdown									
2. Minor - bugs cause some undesired behavior in the software product, but they do not cause any disruption to the app's functions									
3. Major - bugs are more critical as they are capable of causing a system-wide collapse on large parts of an application									
Critical - bugs make a product unusable under certain conditions									
Bug Priority:									
Low priority defects are those that have a negligible impact on the app.									
2. Medium priority defects are those which have a low impact on the app.									
3. High priority defects are those that impact the app the most, they need immediate attention.
